# Biopsy 2.0: Optimizing PGT

## Improve your biopsy, tubing and vitrification skills to improve your PGT results

This workshop is geared towards those experienced embryologists that would like to improve their biopsy skills in order to optimize PGT results. This workshop includes both academic and hands-on learning to include:

- Review of biopsy basics as well as different biopsy techniques with hands-on practice
- Learn about the physics of a laser to improve its use and application
- Discuss the importance of tubing and how it may affect your PGT results
- Explore the practical application of ni-PGT
- Take a look inside the genetics lab to understand what happens to your samples
- Learn how to interpret your genetic results and how the things you do influence those results
- Practical application of vitrification and warming to optimize your results
- Hours of hands-on practice with all techniques

**Space is limited! RSVP by Sept 25th to hold your spot.**

**Location:** World Embryology Skills & Training Center  
5120 Avenida Encinas, Suite 110  
Carlsbad, CA 92008

**Fees:** Workshop is free! Students are responsible for their own travel and accommodation costs.

**RSVP to:** Beatriz Rodriguez at [b.rodriguez@igenomix.com](mailto:b.rodriguez@igenomix.com)
